## Education

---

### Batangas State University

Bachelor of Science in Computer Engineering

August 2020 - Present

GPA 1.6

Computer Programming 1 • Programming Logic & Design • Object-Oriented Programming • Cognate / Elective 1 • Data Structures and Algorithms • Software Design • Cognate / Elective 2

## Technical Skills

---

• HTML • CSS • JavaScript • MongoDB • Express • React • Node • mySQL • Python • Java • Data Visualization • GitHub •

## Experience

---

### Freelance Software Developer

Student

November 2021 - February 2022

- Accepted other engineering's students' projects with relations to programming.
- Created a Library Management System for a client that utilizes python, pandas, and tkinter for the GUI.
- Created a Commute Fee Tracker for another client that shows the commute fee from point A to point B. This also utilizes python and tkinter.
- Both projects got a grade of 95%+.

## Personal Projects

---

### Workout Tracker

- HTML • CSS • JavaScript • MongoDB • Express • React • Node •
  - Created a web-app that tracks your workout progress such as your exercise's load and reps.
  - Implemented MongoDB to store user data and utilized Node.js and Express for server-side scripting

All of my projects can be located in <https://github.com/NoahCrown>

## Certifications

---

• Scrimba's The Frontend Developer Career Path • Udemy's The Complete 2023 Web Development Bootcamp • FreecodeCamp's Responsive Web Design • FreecodeCamp's Javascript Algorithm and Data Structure • FreecodeCamp's Frontend Development Libraries
